Technical details

**//** The highest-performing windows and doors - we wouldn't put our name on anything else **//**

**Doors, windows and conservatories**  
can say a lot about your home - find your individual style.

**Energy efficiency:**  
Choose technology that keeps you warm - right system, right glass.

**Windows:**  
Choose attractive, durable and weather-resistant windows that complement the rest of your home.

**Doors:**  
A range of door options that not only act as a barrier but enhance the look and character of your home.

**Conservatories:**  
See our cleverly constructed conservatories that are comfortable places to relax and enjoy all year round.

**Hardware and Security:**  
All our products have been designed to provide maximum security and peace of mind, find out how.

**Technical details:**  
Comprehensive range of product styles and finishes will help you choose the products that are right for you.

# Helping to make **your house a home**

Bricks and mortar may form the foundations of your house, but it's the doors and windows that really create your home's personality.

So it's worth taking the time to make the right choices. Not only to achieve the perfect look, but also to choose products that will stand up to the demands of today's busy households.

With our comprehensive range of high quality PVCu windows, doors and conservatories, you can be sure to find the products that will suit your individual style. With minimal maintenance, and maximum durability, they'll suit your lifestyle too.

Doors, windows and conservatories can say a lot about your home – find your individual style

/// Our doors and windows have been designed to look good, but also to be extremely secure ///

# Safety and comfort for every generation

As well as adding to the look of your home, your doors and windows need to offer you protection – both from unwanted visitors and the elements.

We offer state-of-the-art door and window locking systems to enhance your home's security and give you extra peace of mind.

All of our products are manufactured using the very latest technology to regulate temperature and provide excellent insulation.

So you can feel safe, secure and comfortable, whatever the time of year.

# We've got the look to meet your every need

Contemporary or classic. Simple or ornate. Doors and windows come in all shapes and sizes, not to mention styles, colours and finishes.

We'll help you select the products that are right for your home – whether you're looking for a simple, elegant style, or a more ornate design, with decorative glass, panels or hardware.

Whatever you go for, our doors and windows not only look fantastic, they last for years. So as well as enhancing your environment, you'll be adding value to your home.

See our full door hardware range.

// We'll help you choose the products that are right for you //

# The best performing windows money can buy

We all want the best from replacement double glazing. That's why our windows stand apart. From styling to performance to saving energy, the advanced design gives you a comfortable, secure, energy-efficient home.

## Understanding Window Energy Ratings

The British Fenestration Rating Council's Domestic Window Energy Rating Scheme provides a way to compare the energy performance of windows on a 'like for like' basis. Windows that achieve a C rating or higher can carry the 'Energy Saving Recommended' tag.

All our Energy Efficient windows achieve C rated or better energy efficiency. Put simply, they're the most energy efficient windows your money can buy. Decide what A, B or C rated performance you want; we'll do the rest.

### Reduce wasted energy. Cut bills.

Choosing our windows to replace single glazed or older double glazed units saves money from day one. In fact, it could reduce your heating costs by up to 20% - perhaps worth up to £321 a year.

### Choose better looking frames.

Our windows feature low profiles with reflective spacers - so you can't see them at

the window edge. Clear, uncluttered sightlines ensure windows look well proportioned, elegant and attractive.

### Stop condensation and noise.

Lower heat loss at window edges makes our glass 3-4°C warmer - cutting condensation by up to 80%. Using high performance gaskets, our double glazing reduces noise pollution, too.

# The next windows you choose could **reduce wasted home energy by up to 20%**

If the windows in your home consist of single glazed or older double glazed units, replacing them with our energy efficient windows will save you money. It can reduce the energy you need to heat or cool your home by up to 20%

## Not all windows are the same

Double glazed units from different sources may look similar at a glance – but don't be fooled. Not all windows are the same. If windows aren't efficient they lose valuable, expensive heat. Many units incorporate spacers using metal such as aluminium which acts as a thermal bridge, instantly conducting heat energy through the frame.

## Energy efficient windows – at the right price

Our energy efficient window system brings together market leading components to deliver exceptional performance. This means quality performing glass and Duralite, the best performing 'warm edge' spacer technology, is used in the sealed unit. Our window profiles include Q-Lon weather seals, multi chamber construction, high security locking and stainless steel hinges.

## Understanding U-values

The British Fenestration Rating Council's Domestic Window Energy Rating Scheme provides a way to compare the energy performance of windows on a 'like for like' basis. Windows that achieve a C rating or higher can carry the 'Energy Saving Recommended' tag.

- Reduce condensation
- Reduce your carbon footprint
- Combat climate change
- Add value to your property

## Our windows make more of ambient heat

In winter, the energy efficient coated glass used in our windows retains warmth within the home. It's also designed to exploit radiant heat energy from the sun. These properties, coupled with excellent thermal insulation, result in significant fuel savings compared to a single glazed dwelling.

Replacing single glazed...	Could save...
...changing timber framed windows to DuraGreen 'C' rated windows saves:	<b>£140.00</b> (0.72 tonnes CO <sub>2</sub> )
...changing Aluminium framed windows to DuraGreen 'C' rated windows saves:	<b>£321.00</b> (1.65 tonnes CO <sub>2</sub> )

Average gas heated bungalow/semi.  
GGF carbon calculator @ 2% inflation.

**Above:** The images show just how effective fitting energy efficient windows to your property can be. The right hand side of the property still has the original windows – the reds and pinks show heat escaping. However, the new extension on the left is fitted with energy efficient windows, the lack of reds and pinks proving they help dramatically reduce heat loss.

Choose technology that keeps you warm – right system, right glass

# Our energy efficient windows **reduce condensation by as much as 80%**

Get a better looking, healthier, more comfortable home. safechoice's superior design and insulation makes all the difference. Outside, your home looks smarter. Inside, everyone feels the benefit.

## Reduce condensation and noise

### Reduced condensation

The air in homes often has a high moisture content. Whenever we cook, bathe or even breathe, we increase water vapour.

When saturated air contacts a cold surface, condensation forms, promoting bacterial growth and mould. Both can compound respiratory problems such as asthma.

With lower heat loss at the edges, our windows are typically 3-4°C warmer than those with metal spacer bars, reducing condensation by up to 80%.

### Cuts down noise from outside

In today's world, it's difficult to avoid external noise.

Whether you live near a major road, under a flight path or near some vocal wildlife, noise pollution can be a cause of major disruption. With double-glazed insulation and our high performance Q-Lon gaskets, our Energy Efficient Windows will help reduce external noise pollution.

### Peace of mind guarantee

- To create the UK's most energy efficient window system, we combine proven technologies and components from world class suppliers.
- Better technology means a longer, maintenance free life.
- Every energy efficient window we install is fully guaranteed against failure for 10 years.

# Windows with style

## Better looking frames

Modern PVC-u and timber windows frequently include low line glazing beads and gaskets. Some protrude into the sightline and are visible at a window's edge.

Our glazing system has a low profile. Because it's slim, it doesn't obstruct the sightlines making windows more attractive.

Even better, as the matt black spacer reflects the frame colour, it's almost completely invisible – perfect for recreating more traditional (e.g. Georgian) window styles.

**The lower sightlines of Duralite blend into the profile, making windows more attractive.**

With Duralite spacer

Without Duralite spacer

# Using less energy means less CO<sub>2</sub>

**Using energy for heating (or cooling) dramatically impacts the environment. Generating energy typically produces greenhouse gases such as CO<sub>2</sub>. The more energy we use, the more emissions we create.**

Science suggests man-made emissions play a major role in global warming and, in turn, influence climate change. Home energy use alone accounts for 27% of UK carbon dioxide (CO<sub>2</sub>) emissions which contribute to climate change.

By making buildings more energy efficient we can reduce energy use and prevent energy waste. In the UK alone, fitting better windows could reduce

carbon emissions by almost 5 million tonnes.

The Glass and Glazing Federation calculates that if all UK replacement windows installed were B and C rated (like our windows) instead of the minimum building regulation specification, each household could save the energy equivalent to making 34,000 cups of tea!

**Energy efficient windows can reduce your carbon footprint and is a simple, practical way to make a difference - today**

Choose technology that keeps you warm - right system, right glass

# How do we do it?

Choose proven technologies for a longer, maintenance-free life – guaranteed.

## The components

### The spacer

#### 1) Warm edge spacers: Duralite

Up to 80% of a double glazed window's energy loss occurs at the glass edge. Ordinary aluminium spacers are highly conductive. In winter they let heat escape and encourage condensation. That's why our windows feature Duralite - a warm edge NON metal spacer. Duralite's advanced composite construction is up to 22x more efficient at preventing heat transfer around window edge. It also has a 60-75% lower vapour transmission rate, increasing window service life.

In thermal efficiency tests with identical glazing specifications, windows with Duralite spacers outperformed windows using aluminium or foam. Slim and reflective, Duralite doesn't obstruct sightlines and mirrors the frame colour. Tested to EN1279, DuraGreen windows join over 50 million windows worldwide already using Duralite spacer technology.

### The profile

#### 2) Q-Lon weather seals

Our windows feature the innovative Q-Lon weather seals. Offering exceptional performance over a wide temperature range, they don't shrink or stretch. Instead they retain their original shape year after year to maintain an excellent weather seal.

The unique construction actively absorbs noise pollution, increasing acoustic insulation. Immune to rot, mould, mildew, UV and ozone, CFC-free Q-Lon weather seals will last the lifetime of a window.

#### 3) Multi-chamber construction and insulated beading

Our multi chamber construction is designed to improve strength, thermal and acoustic performance.

#### 4) Bevelled or featured sash, frame and beads

The double clipped hollow glazing bead is designed to aid thermal performance.

### Other features

#### Stainless steel friction hinges -

High performance, superior quality.

#### High security shootbolt system -

Peace of mind with ease of operation.

### The glass

#### 5) Pilkington glass

Pilkington's range offers proven products and technologies to meet a range of Window Energy Rating and Building Regulation requirements. Providing the Leading Low E glass in the UK, Pilkington also offers a good balance of U and G values, helping your customers to retain costly energy and exploit radiant heat from the sun. Our energy efficient windows can be specified to meet the requirements of the Pilkington Energikare scheme - further assurance of the credentials of our superior window system.

// Choose technology that keeps you warm - right system, right glass

## Solar gain, free heat

Our energy efficient windows are manufactured using the latest technology in glass and spacer units.

This not only allows heat generated from your home to be reflected back into the room but also to trap free heat from the sun through solar gain, thus maximising the thermal performance of our windows.

## Greener manufacture starts in our factory

From the manufacture of our sealed units, to our sources of supply and our support for recycling and recycling initiatives, our system makes sense – environmentally and commercially.

Our energy efficient windows are produced using the award winning BBA and BFRC approved Duraflex profile systems. Duraflex has achieved the ISO 14001 Environment Management System standard and as a result all window profiles are extruded using 100% lead free.

/// Choose attractive, durable and weather resistant windows that compliment the rest of your home ///

# Looking out has never been so good

.....

New windows can really enhance the look of your home, both from the inside and out.  
We offer a wide range of styles to suit both traditional and new build properties.

## Which style is right for me?

From traditional casement to modern tilt and turn, we have a style to suit every home.

Opt for traditional white frames, or a natural woodgrain effect in golden oak, rosewood or mahogany. Then decide if you'd like Georgian, stained, diamond lead or bevelled glass.

Whatever style you go for, you'll find our windows aren't just pleasing on the eye, they're practical too. Minimal maintenance means their good looks will last well into the future.

**Above:** White casement bay window with square diamond leading and mock horns.

**Above right:** White casement window.

# Casement windows

## are attractive and durable

Our range of casement windows is our most popular design, offering security, energy efficiency and is available in a multitude of styles and finishes to enhance the look of your home.

Whatever style you go for, you'll find our casement windows aren't just pleasing on the eye, they're practical too. Minimal maintenance means their good looks will last well into the future.

# Vertical slider

## Combining the traditional and the modern

The vertical sliding sash window range combines the elegance of traditional sash windows with the benefits of modern materials. Manufactured from PVCu they are strong, will not rot, warp or require repainting; ensuring that they retain their colour and shape throughout the years with the minimum of maintenance.

Suitable for both replacing existing timber sliders in period buildings and adding character to any development, vertical sliders retain all the traditional features of their familiar counterpart but with the enhanced benefits that modern PVCu systems provide.

&gt; GEORGIAN BAR

# Design options

## to enhance your home

### Georgian Bars

This style option allows you to tailor your window glazing to create a personal finish for your home. This is achieved by inserting a shaped bar in between the glass panes.

### Astrical Bar

Similar to Georgian bars but offers a more traditional finish by planting shaped bars on top of the glass panes thus creating depth to the design and the look of individual glass units.

### Mock Horn

Our Mock Horn feature enhances the aesthetics of your windows by achieving the appearance of a traditional vertical slider.

&gt; MOCK HORN

Conservatories that are comfortable places to relax and enjoy all year round

# A wonderful way to **extend your home**

---

Most of us could do with more space and light in our homes – and what better way to achieve this than with a new conservatory?

Conservatories have more benefits than you might think. They don't just provide lots of extra room – our insulation means your new conservatory will retain heat in the winter, and won't be too hot in the summer. So it's a comfortable space for you to enjoy all year round.

With a variety of styles to choose from – ranging from contemporary to more classic designs – you're sure to find just the right way to bring the garden into your home...and your home into the garden!

# A versatile space for all occasions

Deciding which style of conservatory is right for you can be fun – even if it's not always easy. First you'll want to consider how best to complement your home, and what you really hope to get out of your new room.

// Conservatories that are comfortable places to relax and enjoy all year round //

Will it be a study, perhaps, or a playroom? Or maybe you just want a bit more space to relax. When it comes to what you want, you're the expert!

So once you've given thought to your lifestyle and how your new room can reflect it, simply turn the page - you're sure to be able to find a conservatory that fits your needs.

**When choosing your conservatory why not personalise it with furnishings and accessories.**

1. Traditional Rod and Boss tie bar.
2. Low voltage ridge lighting.
3. Ceiling fan.

# Choosing your style...

Deciding which style of conservatory is right for you can be fun - even if it's not that easy. Sun room, living room or office - we'll help make it the perfect place.

## Victorian

A popular style distinguished by a faceted front, giving a curved appearance. A particular favourite with period properties, however it's clean lines make this a winner on any type of home.

## Georgian

A flat-fronted style that offers excellent use of floor space due to the square or rectangular internal shape. Its sloping roof and contemporary style is suited to the majority of properties.

## P-Shape

A P-Shape can combine a Lean-To and a Victorian to create a versatile and visually stunning open space. Due to the proportions needed, this style is better suited to larger properties, giving an impressive result.

## T-Shape

As with the P-Shape, this style is more suited to larger properties. A combination style that's distinguished by a central projection that can either be a Victorian, Gable or Georgian. A T-Shape offers a large and versatile floor space and is an impressive addition to any home.

Conservatories that are comfortable places to relax and enjoy all year round

### Gable

A gable-fronted conservatory adds a sense of grandeur to any home. Featuring the same rectangular floor space as a Georgian, a gable offers excellent use of internal space. The front panel of the roof remains upright rather than sloping back, to create a feeling of greater height within the conservatory.

### Lean-To

For properties with little room under the eaves or for those homeowners that prefer a clean simple look, a Lean-To conservatory is the ideal choice. The pitch of the roof can be varied, making this a versatile and ever-popular option.

### Lantern

The 'original' conservatory style, a Lantern ensures drama and grandeur. Distinguished by the two-tiered feature roof, the height within a Lantern adds an extra dimension to the feeling of light and space. A popular choice for swimming pool enclosures.

### Custom

Although the shapes and designs shown are all bespoke, you may have your own 'one-off', exceptional or unique idea. The doors, windows and roof systems in this brochure combined with our expertise should allow you to achieve that dream.

# Top tips for choosing your conservatory

## 1. Use

What do you hope to get out of your new room? Will it be a study perhaps? Or a playroom? An office? Or maybe

just an extra space to relax in. Whatever you choose, its use will determine how large you need your new space to be, and which layout will best accommodate your needs.

## 2. Materials

Your new space should fit seamlessly with your lifestyle. Materials such as PVC-u are incredibly hardwearing and

low maintenance. No need for step ladders and re-painting, oil on the hinges and a wipe down every now and again will keep your conservatory looking like new.

## 3. Positioning

Think about the position of your conservatory. Those that face the South will receive the most sun during the day. If this is the

case, you may need to consider extra ventilation and possibly blinds in order to block out some of the harsher rays.

## 4. Size

Once you've made a decision on your design, it might be best to check the dimensions of both your house and your garden. A

conservatory should be an extension of your current living space, and shouldn't take up valuable garden space.

## 5. Glazing

New advancements have been made to ensure the glass used in conservatories works its hardest for the homeowner.

Keeping you cooler in summer and warmer in winter means a conservatory isn't just a seasonal room.

## 6. Planning permission

If you're building a conservatory in England or Wales, you will not usually need planning permission. However, it is always better to

be safe than sorry. If you are in any doubt always check as early as you can with your local council.

Conservatories that are comfortable places to relax and enjoy all year round

# Whatever the weather

**When planning how to make the most of you conservatory, there's a lot to consider – its size, shape, and of course, how much sun it gets.**

Our heat reflective glass will ensure you enjoy your conservatory all year round. Its unique coating reflects almost twice as much solar energy as standard glass, and reduces the glare on those bright sunny days.

Because it's designed specifically for British weather, it doesn't just perform in summer. It also has special 'spacer technology' to retain heat and increase the edge temperature by up to 65%, so you can enjoy your new conservatory at just the right temperature – whatever the weather.

The unique coating reflects about 69% of total solar energy. Almost twice as much as standard glass.

Warm edge spacer technology increases the edge temperature by up to 65%.

Glare is reduced by 44% all year round compared to standard units.

Reduce potentially expensive heating bills. Our product outperforms standard glass by more than 50%.

This product is a world first, offering true self-cleaning glass that never stops working.

# Security you can rely on. **Expect nothing less**

---

Whether its our unique 8 point Sac locking system for windows or our 10 point high security door lock, we never compromise on ensuring security, along with aesthetics and energy performance are 'standard' on all our products. Hard wearing, durable windows. It's all in the design making our products the safe choice for your home.

All our products have been designed to provide maximum security and peace of mind,

# Window security

**Hard wearing, durable windows.**

**It's all in the design**

However important windows are to the style of your house, the security they offer is even more important. The more confident you feel inside your home, the happier you'll be...

Our Sac shootbolt locking system is specially designed to improve security and performance that is second to none. It also takes pressure away from the hinges, ensuring a longer life for your windows. The tight seal guarantees superb weather protection too, so you'll feel safe and secure in every way.

**20% more shootbolt penetration**

**400% more shootbolt keep contact area**

**Increased full depth Eurogroove lock-out**

**Industry leading 8-point locking system**

**Adjustable locking rollers**

**Unique handle, modern design**

**Superglide Gearbox**

**Q-Lon, draught proof for life**

## Features and benefits

- Point locking system with unique corner drive design on all windows regardless of size.
- Unique full depth Eurogroove lock-out design to maximise security performance.
- 400% more shootbolt contact area with keep when compared to traditional flat shootbolts.
- Supaglide gear box action, tested to 100,000 cycles (equivalent to 30 years of heavy use).
- Rigorously tested to BS7950 and beyond to achieve Secure by Design status.

# Door security

Industry leading security,  
intelligent thinking.

Doors are at the heart of your home's security, and we design our products to ensure that visitors to your home are only the welcome ones.

Not only do all our doors meet industry standards, but we also work closely with the police under the 'Secure by Design' scheme to make sure our customers enjoy the best possible protection and peace of mind.

> PRE-COMPRESSION ROLLER

> HOOK AND DEAD BOLT

/// All our products have been designed to provide maximum security and peace of mind,

So, whether it's our security hinges, state of the art 10 point locking system, our dedication to security is second to none.

## Features and benefits

- 10 point locking system for maximum security and peace of mind.
- 4 pre-compression rollers allowing door to seal prior to hooks engaging for smooth operation.
- 3 opposing steel hooks to maximise strength.
- 2 anti-lift bolts preventing door lock being dislodged from keeps.
- 1 centre latch for ease of day to day operation, incorporating dead-lock action when bolts and locks are engaged for added security.

# Tilt and Turn

## Technical Specification

Tilt & Turn windows consist of opening in sashes, which can be operated in two ways. Turn handle 90° to tilt top of sash inwards with restrictors (hinged at bottom), turning handle a

further 90° allows sash to open fully inwards, hinged on the side for access and cleaning.

Available in a multitude of styles and various finishes.

### Typical styles

\* Can incorporate opening out sashes

### Hardware

Consists of perimeter gearing to all sashes with multipoint lock around each sash

### Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

### Product options

Mock Horns an option to top hung casements. The bottom of the sash has an extruded feature to give the appearance of a Vertical Slider.

Can only be incorporated in top hungs that include a fixed light below.

# Vertical sliders

## Technical Specification

Our Vertical Slider combines traditional design with modern technology, available with a range of Georgian bars to create the required look.

Both sashes slide vertically to open. They can also be tilted inwards for ease of cleaning.

## Typical styles

## Hardware

Modern spring balances ensure smooth operation, centre fitted catch and corner latches provide security with traditional looks.

## Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

## Product options

Vertical Sliders are supplied as single products but can be coupled to any other product to achieve the required look, this includes box bays and multiple coupling.

# Bays and bows

## Technical Specification

Bays follow the shape of the building creating more internal space allowing you to walk into the area.

Bows provide the look of Bays but do not allow you to walk into the area. Very similar designs can be achieved for both, with a variety of product.

### Typical styles

Three facet bay

Box bay

Five facet bay

### Bays

When three or more frames are fixed together and they project beyond the main face of the building. The brickwork above and below follows the contour of the actual window frames. Therefore allowing a person inside the building to walk into the bay area.

Box bay is when the side windows are at 90 degrees to the front.

Variable bay incorporates the side windows at an angle that allows them to be seen from the front.

### Bows

Similar in appearance to a bay window which projects beyond the brickwork.

However, the actual brickwork face remains flush with the main building structure. This type of window does not allow a person to walk into the bay area.

Commonly, available on 3, 4 and 5 segments.

# Panel door

## Technical Specification

Panel doors are of PVC construction, combining versatility in design with modern locking technology.

Available to open inwards or outwards.  
A variety of styles are available which includes side light options.
